Overview

This guide walks you through creating real-time analytics dashboards in Databox using Google Sheets as your data source. You'll learn how to:

- Structure your Google Sheets data for optimal dashboard performance
- Connect Google Sheets to Databox
- Create dynamic metrics and visualizations
- Set up automated data refresh

Prerequisites

Before starting, ensure you have:

- A Google Workspace account with access to Google Sheets
- A Databox account (Business tier or higher)
- Your metrics data ready for import

Additional Resources

- [Databox Documentation](#)
- [Google Sheets API Reference](#)
- [Community Forums](#)
- [Video Tutorials](#)
